

Certification Labs

GIA - the **Gemological Institute of America**, is the leading gemological laboratory in the world. It is the industry's most trusted and most widely used service. Headquartered in Carlsbad, California, GIA has offices in many cities around the world, employing more than 1400 scientists, educators and certified diamond graders.

AGS - stands for **American Gemological Society** and it is also a US based laboratory (*with main offices in Las Vegas*). They are also globally consolidated through offices in Israel, Belgium, India, China and Hong Kong.

IGI - is the International Gemological Institute that is based in Antwerp, Belgium. After GIA, they are actually the 2nd most well-known lab in the world.
